5        COMBINED TUMOR SUPPRESSOR GENE THERAPY AND CHEMOTHERAPY IN  
         THE TREATMENT OF NEOPLASMS

         ABSTRACT OF THE DISCLOSURE

10                In one embodiment, this invention provides methods of treating mammalian  
                 cancer or hyperproliferative cells, said method comprising contacting said cells with a tumor  
                 suppressor protein or tumor suppressor nucleic acid and also contacting said cell with at least  
                 one adjunctive anti-cancer agent. The invention also provides for a pharmacological  
                 composition comprising a tumor suppressor protein or a tumor suppressor nucleic acid and at  
15                least one adjunctive anti-cancer agent, and a kit for the treatment of mammalian cancer or  
                 hyperproliferative cells.
